The scherzo is the sufficient warmth to trap her to coming to a hotel where he is able to avow his love for her. It must be said at her behalf that the husband of the cuteoffy is of such political importance has he neglects her just as husbands when there is a handsome lover about the first having a slow introduction, and the third is an andante. The scherzo is the best of the four. Here the rejective are more clearly defined and the orchestral writing is more effective. In the slow movement there is much meandering without progress, while the final allegro leans at times toward idealization of dance rhythms, but here quite reaches it. The work must have been composed years ago, and doubtless McFloridia writes now with more certainty.

There were some smart London talk of the familiar kind, a great deal of wear-some detail about trains that had been missed and longage that had not been registered at Charing Cross But beyond the frank light these sciency threw on certain phases of British society, they interested the spectators so little that both acts ended with searcely a trace of applause. It is by its third act alone that "The Butterfly on the Wheel" must stand or fall before the New York public.

Charles Quartermaine played the lover Charles Quartermaine played the lover with a passion that excused the trick he played on the woman he loved and suggested what Lewis Waller must have been in the part. As the injured husband Eille Norwood exhibited the dignity that was all the rôle allowed. Evelyn Beerholm, a nephew of the more noted flerbert, was easy and amusing as a simple minded lordling sidney Valentine was sufficiently relentless as the lawyer to have trightened others than a poor futterfly into hysteries.
